GREEN INNOVATION, MULTIPLE APPLICATIONS

For over 30 years Denbow has consistently served the BC agriculture, landscape and construction industries. Leading in innovation, Denbow now provides a comprehensive range of cost-effective 'Green' products and services that are compliant with LID (low Impact Development), LEED, BC Landscape Standard and Built Green Canada. Our products include recycled materials, such as composted forestry residuals, and minimize environmental impact by using green infrastructure technologies. These sustainable technologies manage storm water, stabilize and retain slopes, reduce erosion, green cities and benefit the environment.
